

Application Instructions

To ensure proper application, remove the shine from the natural nail with “The Gator” Buffer and gently push back cuticles and remove pterygium with the Pumice Stone Cuticle Pusher. Remove the dust with “Just a Brush”. Apply one spray of Thymol Septic to nails. Apply one application of Affix Adhesion Enhancer to all nails.

If applying Natural Finish Plus® over natural nails, follow these simple instructions.

1. Shape the natural nail.
2. Base coat the nail with NFP Brush-On Bonder (make sure your brush is very wet). Reimmerse the brush, then pick up a ball of NFP Base Powder and place it on the stress point of the nail. Wipe brush on a Lint Free Brush Wipe and immerse back into NFP Brush-On Bonder. Making sure your brush is very wet, stroke the product evenly over the nail, making sure to leave a 1/8” margin at the cuticle and side wall area to avoid contact with the skin.
3. Repeat step 2, but place the 2nd ball of NFP Base Powder slightly behind the first. (product will remain slightly tacky)
4. Finish your application with 1-2 thin coats of NFP Resin Gel (clear) by running a line approximately the same size in diameter as the nozzle of the bottle, down the center of the nail and brush it out with Natural Finish Brush-On Activator.
5. Allow nail to dry.(approximately one minute) If any additional buffing is required, use “The Gator” board to smooth

the surface. You can shine up the nail with a 3-way shiner for a high gloss finish.

Apply a small amount of Esencia Desert Oil to cuticle area and rub in. (if polishing, complete this step last)

(steps are in increments of 10)

Applying over a tip

1. Prepare nail as required and pre base the natural nail with one application of NFP Resin Gel and brush out with NFP Brush-On Activator.
2. Select a tip the correct size and adhere to the natural nail by brushing a small amount of NFP Brush-On Activator in the well area of the tip and follow with a thin layer of NFP Resin Gel.
3. Cut length. Shape tip and remove shine from entire artificial tip with the Peach side of the Red/Peach File.
4. Apply Miracle Dissolve to well area of the tip, allow to sit for approximately 15 seconds. Using the Peach side of the Red/Peach file, push with firm pressure in the same direction to blend in the tip to the natural nail. (this step may be repeated until desired blend is achieved) Remove the dust with the “Just a Brush”.
5. Base entire nail with NFP Brush-On Bonder (make sure your brush is very wet). Pick up a ball of NFP Base Powder and place at the stress area of the nail. Wipe brush on a Lint Free Brush Wipe before immersing back into NFP Brush-On Bonder. Making sure your brush is very wet, stroke the product over the nail,

making sure to remain 1/8” away from cuticle and side wall area to prevent product from coming in contact with the skin. Repeat this procedure, but place the 2nd ball of NFP Base Powder slightly behind the first.

6. Finish your application with 1-2 thin coats of Natural Finish Plus Resin Gel (clear) by running one line (approximately the same size in diameter as the nozzle of the bottle) down the center of the nail and brush it out with NFP Brush-On Activator.
7. Allow nail to dry. If any additional smoothing is required, use “The Gator” board buffer. You may use a 3-way Shiner to create a high gloss finish. Apply a small amount of Esencia Desert oil to cuticle area and rub in. (if applying polish, complete this step last)

Applying over a white tip

1. Prepare nail as required and pre base the natural nail with one application of Perfect Finish Pink Resin Gel and brush out with NFP Brush-On Activator.
2. Select a Finola White Tip and adhere to the natural nail. Remove shine from tip.
3. Base nail with NFP Brush-On Bonder (make sure brush is very wet), pick up a ball of NFP Base Powder and place it at the stress point on the nail (just behind the smile line). Wipe brush on a Lint Free Brush Wipe before immersing back into NFP Brush-On Bonder. Making sure your brush is wet, stroke product over nail, remaining 1/8” from the cuticle and side

wall area to prevent coming in contact with the skin.

4. Repeat Step 3, but place 2nd ball of NFP Base Powder slightly behind first ball.
5. Finish your application with 1-2 thin coats of NFP Resin Gel (clear) by running one line (approximately the same size in diameter as the nozzle of the bottle) and brush out with NFP Brush-On Activator.
6. Allow nail to dry. If any additional smoothing is required, use "The Gator" board buffer to smooth the surface. You may use a 3-way shiner for a high gloss finish. Apply a small amount of Esencia Desert oil to cuticle area and rub in. (if polishing, complete this step last)

Fills

Fills should be done every 2-4 weeks.

1. Gently push back cuticles and remove pterygium with the Pumice Stone Cuticle Pusher.
2. Use Miracle Dissolve and brush over entire nail.
3. Using the Peach side of the Red/Peach file, blend off one layer of old product. Repeat this step until nail is desired thickness.
4. Adjust shape and length of nail.
5. Reapply new product according to initial application instructions.
6. Finish as normal.

It is not recommended to mix other acrylic powders or glues with this system!

Doing so will greatly reduce the success of the application procedure and result in a substandard nail. Miracle Dissolve is also used as a "brush cleaner".

Kit contents: Just a Brush, The Gator Board, Red/Peach File, Natural Finish Plus Brush-On Bonder 1/2oz. , Esencia Desert Oil 1/4oz. , Perfect Finish Pink Resin Gel 1/2oz. , Natural Finish Brush-On Activator 1/2oz., Natural Finish Resin Gel 1/2oz., Miracle Dissolve 1/2oz., Affix 1/2oz. , Thymol Septic 1oz., Extra Cap/Brush for Brush-On Bonder, Natural Finish Plus Base Powder 1/2oz., 20cnt Finola Tips, 20cnt Natur-a Tips, Pumice Stone Cuticle Pusher, Poly Pro Stick, Lint Free Brush Wipes, Instruction Sheet.
