

Directions for applying
PERFECT FINISH

When applying Perfect Finish over Elegant Glass follow these directions.

NEW NAIL APPLICATION

Follow the usual elegant Glass directions until you have applied two thin coats of the Resin Gel.

Apply Perfect Finish as follows:

1. Apply a thin line of Pink Resin Gel down the center of the nail and brush out evenly with the Brush-On Activator. Be sure to stay away from the cuticle and sidewalls to avoid lifting problems. Wipe your Activator brush on a Lint Free Brush Wipe. If brush needs additional cleaning, dip into Activator again and wipe on the Brush wipe a second time. A second coat of pink may be applied if more color is desired. Remember to use **thin light coats**.
2. Using the Roller Buff (fine buffer) smooth out any rough edges along free edge and back by cuticle and sidewalls. **IMPORTANT:** Do not file on top of wrap - you are only trying to smooth out any rough spots.
3. Apply the Perfect Finish White evenly to the free edge of the nail. Swipe brush from left to center and right to center or use a French Manicure guide for a clean crisp line. Make sure you seal all the edges of the nail. Do not be too concerned about brush strokes- they will even out with the final application of Resin Gel.
4. Apply 1 coat of Clear Resin Gel and brush out with the Brush-on-Activator making sure you seal all the edges of the nail. Make sure you do not touch product on the skin at the cuticle and sidewall area. This prevents lifting.

If any buffing is required afterwards, make sure you do it very lightly with only a Pink Crystal Cube or 3-Way Shiner. If too much buffing was required an additional thin coat of Clear Resin Gel can be applied.

Apply Esencia Oil to cuticle and sidewalls.

APPLYING OVER AN EXISTING ELEGANT GLASS NAIL

Following normal 2-3 week fill directions.

Follow these directions from this point on:

2-3 weeks:

1. Apply a thin line of Pink Resin Gel down the center of the wrap.

Brush out evenly with the Brush-on-Activator.

Be sure to wipe your brush in the Lint Free Brush Wipe. Remove any rough spots with the Roller Buff (fine buffer). A second coat of Pink Resin Gel may be applied if more color is desired. Use **thin light coats.**

2. Apply the Perfect Finish White evenly to the free edge of the nail. Seal all edges. Remember to apply left to center and right to center, or use a French Manicure guide for a clean line. Let dry to touch.
3. Apply a thin line of Clear Resin Gel to center of nail. Brush out evenly with Brush-on-Activator, seal all edges!!

Finish as usual.

4-6 weeks

1. Apply a thin line of Pink Resin Gel down the center of the nail and brush out evenly with the Brush-on-Activator. Be sure to stay away from the cuticle and sidewalls to avoid lifting problems. Wipe your Activator brush on a Lint Free Brush Wipe. If brush needs additional cleaning, dip into Activator again and wipe on the brush wipe a second time. A second coat of pink may be applied if more color is desired. **Remember to use light thin coats.**

Finish by using the New Application directions Steps 2-4

APPLICATION OVER ACRYLIC

Follow your manufacturers directions until nail is finished

Use the Perfect Finish as a finishing step.

1. Apply Pink Resin Gel by placing a thin line down the center of the nail. Brush out evenly with the Brush-on-Activator. Be sure to wipe your brush on the Lint Free Brush Wipe. If additional cleaning is necessary, dip brush into Activator again and wipe second time.
2. Apply the Perfect Finish White evenly to the free edge of the nail, sealing all edges. **LET DRY TO TOUCH.**

3. Apply 1-2 coats of Clear Resin Gel with a line down the center of the nail. Brush out evenly with the Brush-on-Activator, making sure you wipe the brush on the Lint Free Brush Wipe. Finish with a Pink Crystal Cube or 3-Way Shiner.

IMPORTANT!!!

Avoid letting Activator run onto the Perfect Finish White to prevent any smearing.

When using the Perfect Finish Thinner, start with four drops and add more as needed to thin to desired consistency. Shake well before using.

To prevent Perfect Finish White from chipping, make sure all nail edges are sealed.

Miracle Dissolve can be used to remove white from surrounding nail skin.

Brush-on-Activator can be used to perfect the smile line.

Always use Non-Acetone polish remover.

Esencia Oil and The Shiner will restore shine to the nails after polish has been removed.
